

contraceptive operations in order to prevent successive births of kittens. But we think that Kawasaki city administration has the responsibility in bearing this, because this is caused by the project headed by the city. This same problem has occurred everywhere in the city in the past and every time it was the citizens who felt pity for the miserable strayed cats making them take care of the kittens. This reflects the reality in which the city administration puts no budget for this type of situation. (Please see attached example)

2) Placing temporary shelter for the refuged animals

It is inevitable that the cats which lost the place to live wander into the surrounding residential area to seek for food. Even at present, the troubles concerning strayed cats often occur in this area.

3) Proper Management of the refuged animal shelter. (Under homeless supervision)

4) Set up of the feeding area

For the cats which can't be refuged in the shelter, a feeding area must be setup, with undergoing contraceptive operations. (Under homeless supervision.)

5) Showing children the preciousness of life through action.

Every year, many kids pick up dozens of kittens and bring them to the homeless in the park to try and save them from the city health center where they will be killed. . This is because the parents won't accept kittens at home. Even at school, the school teacher is helpless. This leads to action by many kids who ask the homeless to take care of the kittens. With these facts in mind, even if the park is renewed, the kids will be heart broken when they find out how the animals were treated. Afterall, the kids learn the preciousness of life not by words, but how we act.

With these facts in mind, we strongly demand this project to be fair for all living lives, and hope this project will be respectable in all matters.

I hereby agree to this content and submit these requests.

Dear Mr. Takao ABE

Hello My name is Akiko YUI. Today I am contacting in regards to the construction of the facilities for the World Cup of American Football.

First, we would like to state that it is an honor that in 2007, the World Cup of American Football will be held in Kawasaki. And, it seems superficial to take down the old parts of Fujimi park and renew its community garden, citizen's square with swimming pool, and the children's square. However, behind this big project, 180 homeless people living in the park have to move its shelter, and about 150 strayed dogs and cats will not able to continue living. They will lose the place to live, and have no choice but to wander out into the surrounding, Fujimi or Oshima area. It also can be considered to cause new troubles for the environment.

By grace of the mediation of the city councilor, we appreciate to have the chance to announce our requests. We strongly request you to have needful measure as soon as possible, and you create the city where all living creatures can live together in peace.

Complying with "The Protection and Control of Animal Law"

This big project is budgeted at ○○ billion yen, even the cost for repairing the sumo arena is budgeted at 15 million yen. However, knowing the existence of many animals which the homeless people own, the scheme to deal with these situation has not been considered or budgeted.

As the proverb, ' ' Even a worm will turn ' ' says, all lives should be treated fairly. Did we forget the respect for the weak?

We always have to try to understand their pain, suffering, sadness and solitude in their place.

Please solve this problem in respect to "The Law Concerning the Protection and Control of Animals".

1) Undergoing contraceptive operations

We are not asking to subsidize for our own pets. We managed to have a part of cats undergo
